Elog - Bug #14672

Searches are slow

11/28/2016 12:36 AM - Michael Wren

Description

Searches of the Elog now take a lot longer than the used to on the old version.

For example, the search I use to get the last MicroBooNE shifter:
https://www-bd.fnal.gov/Elog/api/search/entries?orLogName=Operations&limit=1&searchString=microboone+shift&sortingDirection=DESC
Now takes six seconds. This is noticeably slower than the previous version, which I think took just about 1 second.
